## ➔ **The Distron Difference**

Supporting Distron’s core capabilities are an extended range of important manufacturing and support activities - all easily accessible to you and your team. These complementary yet often critical services and features include:

- Quick-turn prototype through production
- Turnkey and consignment services
- High quality pin-thru-hole assembly
- Comprehensive supply chain management
- Dedicated program management teams
- State-of-the-art Aegis Manufacturing Operations Software
- A fully integrated ERP system
- ISO 9001 & ISO 13485 Certified
- FDA Registered
- Fully trained and certified workforce to IPC610 Standards
- In-Circuit and functional testing
- Flying Probe

# Distron's Core Manufacturing and Assembly Strengths

**Advanced SMT Printed  
Circuit Boards**

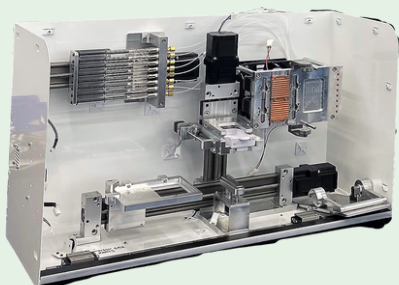

**Flexible Circuits**

**Electro-Mechanical Products**

**System Level Integration**

## A Message From the CEO

Welcome to Distron, where precision meets innovation electronic manufacturing. At Distron, we're committed to delivering services that exceed your expectations. I would be thrilled if either myself or one of our knowledgeable Distron team members could illustrate how, at Distron, premium is synonymous with value.

Please allow us the opportunity to showcase our expertise and prove the correlation between our premium offerings and the value they deliver.

Best regards,

Robert Donovan  
CEO, Distron Corporation
